

OFFICE OF MEDICAL SERVICES STATEMENT ON DRUG ABUSE

Because of diverse views on drug usage coming from many perspectives and sources, a clear statement is deemed necessary and useful.

The medically unsupervised and non-prescribed use of drugs (with particular reference to marijuana, barbiturates, amphetamines, hallucinogens, and narcotics) cannot be justified, supported, or condoned by the Office of Medical Services as useful in any fashion to man's well-being.

General information or help with specific problems is available through OMS Consultative Services.
